

ALICE CLARK

Delhi, India | +919876543210 | alice.clark.se@email.com | linkedin.com/in/aliceclark | github.com/aliceclark

PROFESSIONAL SUMMARY

Software Engineer with 5+ years of experience in Java development, Spring Boot, and full-stack enterprise applications. Expert in Core Java (Java 11/17+), JVM internals, multithreading, and building scalable REST APIs. Skilled in relational and non-relational databases (PostgreSQL, MySQL, MongoDB), Elasticsearch, and modern frontend frameworks (React, Next.js, Material UI). Proficient in AI-assisted development tools (GitHub Copilot, ChatGPT, Claude) and prompt engineering techniques to accelerate product delivery. Willing to relocate to Puerto Rico.

TECHNICAL SKILLS

- **Programming Languages & Core:** Core Java (Java 11/17+), JVM Internals, Concurrency/Multithreading, Memory Management & Tuning, Python.
- **Enterprise Frameworks:** Spring Framework, Spring Boot, Spring MVC, Spring Security, Hibernate, JPA.
- **RESTful API & System Architecture:** RESTful API Design & Security, Microservices Architecture, Design Patterns, Algorithms, System Integration.
- **Databases & Search Technology:** Relational & Non-Relational Databases, PostgreSQL, MySQL, SQL Server, MongoDB, Elasticsearch, Indexing Technologies.
- **Frontend Development:** React, Next.js, Material UI, HTML5, CSS3, JavaScript.
- **DevOps, Cloud & Tools:** Microsoft Azure, Docker, Kubernetes, CI/CD, Git, JUnit, Mockito, Maven, Gradle, Agile/Scrum.
- **AI-Assisted Development:** AI-Directed Prompt Engineering, GitHub Copilot, ChatGPT, Claude, Cursor.
- **Languages:** English (Fluent), Hindi (Native).

WORK EXPERIENCE

Software Engineer (formerly Junior Software Engineer)

Microsoft Corporation | Bangalore, India | July 2019 – Present

- Design, build, and secure robust, scalable REST APIs using Core Java 11/17+ and Spring Boot, handling 50M+ daily requests with sub-100ms latency.
- Participate in requirements analysis, architecture, system integration, and testing of microservices deployed using Docker and Kubernetes.
- Optimize relational and non-relational database queries, stored procedures, and indexes across PostgreSQL, MySQL, and MongoDB, reducing execution time by 45%.
- Implement search and indexing capabilities using Elasticsearch for real-time visualization of business-critical system metrics.
- Utilize AI-assisted development tools (GitHub Copilot, ChatGPT, Claude) and prompt engineering techniques to accelerate feature delivery by 25%.

Software Engineer (formerly Junior Software Engineer)

Accenture | Bangalore, India | November 2018 – June 2019

- Developed RESTful web services using Java 8/11 and Spring Boot for high-volume financial transaction processing.

- Designed frontend applications and responsive UI components using React, Next.js, and Material UI.
- Implemented Elasticsearch indexing for document repositories and executed automated testing with JUnit and Mockito to ensure code quality.

Software Engineer *(formerly Junior Software Engineer)*

Infosys | Pune, India | September 2017 – October 2018

- Built Java backend services, designed REST APIs, and managed database schemas in MySQL and PostgreSQL.
- Implemented Elasticsearch search engines across 1M+ records, delivering sub-200ms search response times.

PROJECTS

- **Real-Time Analytics Engine (Microsoft):** Engineered high-throughput Java and Spring Boot pipelines processing petabytes of data with Elasticsearch integration.
- **Microservices Migration (Accenture):** Migrated monolithic systems to Spring Boot microservices using Docker and Kubernetes, cutting deployment time by 60%.

EDUCATION

Bachelor of Technology in Computer Science & Engineering

Indian Institute of Technology (IIT) | Mumbai, India | Graduated 2016

- **CGPA:** 8.5 / 10.0

CERTIFICATIONS

- Oracle Certified Professional (OCP) Java 11
- Microsoft Certified: Azure Developer Associate
- Spring Professional Certification
